2022 - 2022

Doctor Appointment System Project · In the Doctor Appointment System Project the doctors and patients are brought to the single platform that allows patients to be extra flexible. worked on a web application that utilized HTML JavaScript CSS3 PHP and SQL.

Projects

Cryptocurrency Finance Price Tracker

We use React Hook in this React JS Project. We mainly use useEffect and useState You be able to search currencies and have it display on the browser. Also the prices will update live whenever you refresh the page. We get all the data from a public API.

Exploratory Data Analysis

- · Performing in the data sets are Data Exploration Data Cleaning Model Building and Present Results.
- · Library used for this analysis are NumPy Pandas Matplotlib and seaborn.

Web scraping using Python

Used the Beautiful Soup Pandas python Library to extract the desired data from a given URL in an automated way.

- · Reverse engineered web technologies like JSON and HTML to provide organized bid data.
- · Finally the scraped file can be stored in .csv format

Achievements

Google Cloud

Baseline Infrastructure Badge and Google Cloud Essentials Badge -2021
